

Project Initialization and Planning Phase

Date	28 June 2026
Team ID	xxxxxx
Project Name	Personalized Networking Assistant
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The problem statement serves as the foundational element of this project. It articulates the specific challenges that professionals encounter during networking events, including the inability to initiate meaningful conversations due to generic icebreakers, the lack of instant access to reliable information for fact-checking, and the absence of a feedback mechanism to track networking effectiveness. By clearly defining these problems, this section justifies the need for the project, establishes clear objectives, and provides direction for developing a targeted AI-powered solution. The problem statement ensures that all subsequent project activities are aligned with addressing real user needs and delivering tangible value.

Example:

Problem Statement (PS)	I am (User)	I'm trying to	But	Because	Which makes me feel
PS-1	A professional attending networking events	Initiate meaningful conversations with strangers	I don't know what to say or how to start	I lack context about event themes and others interests	Anxious and hesitant to approach people
